## Ready-Link Legs

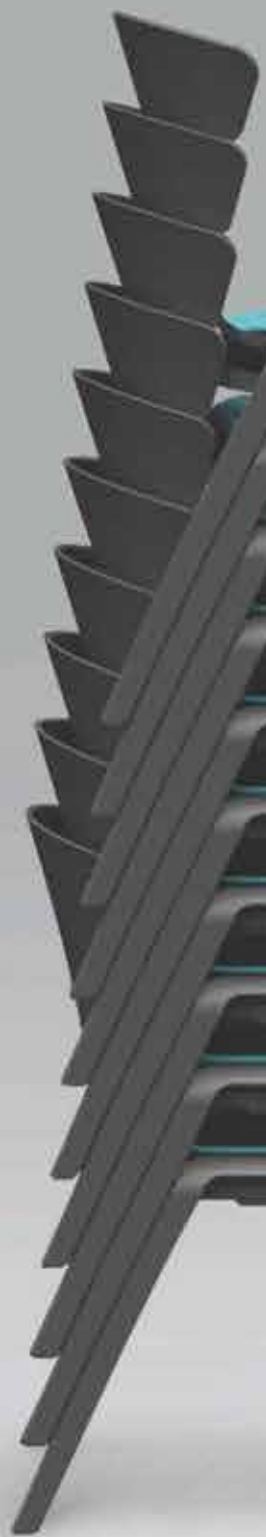

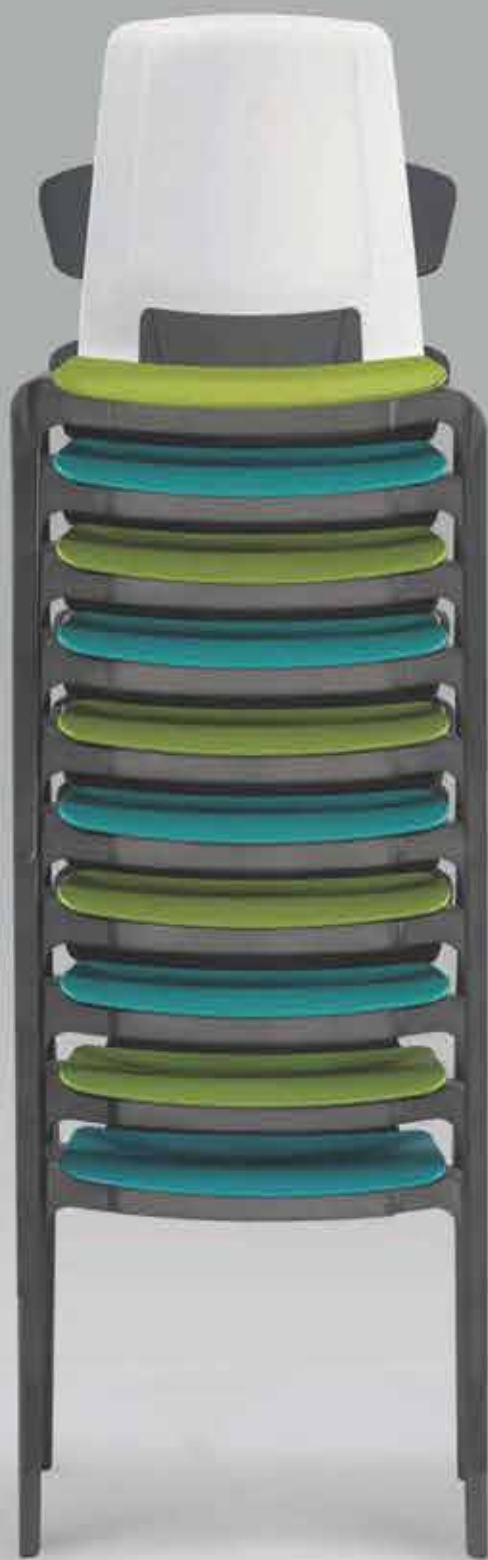

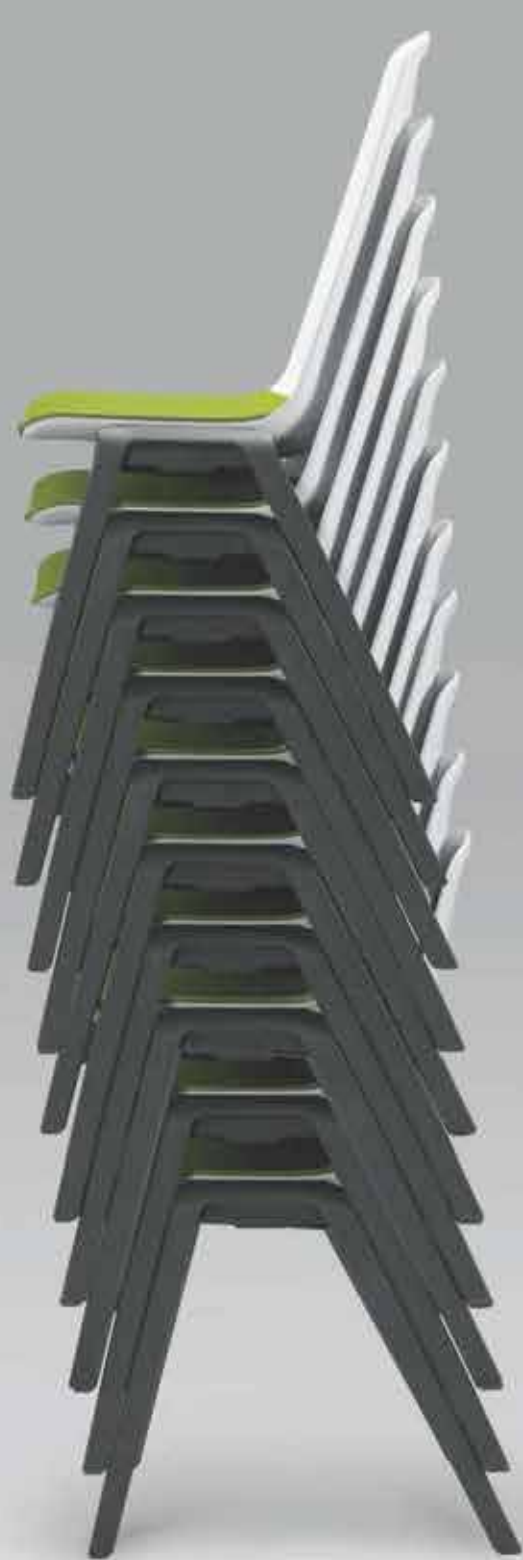

*Linx* is a multi-purpose chair suited for hotel, convention, banquet and event seating. It is ideal for setting up large numbers of seats and quickly storing them away after the event.

Unique to *Linx* are its Ready-Link legs which make chair ganging a simple and swift process. In large events and venues, ganging chairs together creates neatly aligned rows for easy access to seats whilst promoting orderly evacuation in the event of an emergency.

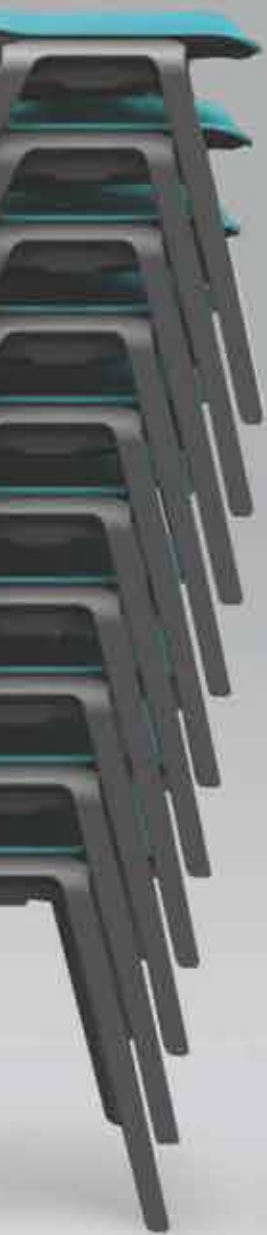

The legs are designed to interlock with each other in seconds without the use of tools or brackets. Overlapping legs appear as a single leg to reduce visual clutter.

# Stacks Straight Up

You can stack 10 *Linx* chairs high with stability. Once stacked, a trolley quickly lifts and transports stacked chairs away for storage. A single trolley can shuttle an unlimited number of chairs.

**Polypropylene Shells** offer a hard wearing and soil-proof surface for outdoor and heavy duty events. The seat shell colour can be selected independently from the back colour to create unique colourways. Muted uniform colours can be specified if contrast colour-blocking is not to your taste. A drainage hole clears rain water on the seat.

**Padded Textile** exudes warmth and coziness, as well as lending some organic texture. With some clever shaping, the seat pad is thicker and plusher than its slim appearance suggests. Seat and back pads can be removed and replaced without special skills or tools (screws and velcro fastening).
